The migrants Indians strived to make their social presence felt to the host societies. They have a very long history of survival imbibed in different struggles. The path had never been easy. Emotional dislocation, physical distance and political alienation have taught them the skill to excel. The communities even though shun by their own country, never remained exhausted and continued their march to succeed in strange and new environments. It happened a number of times that the Host countries itself faced turmoil in their political and social spaces, even then the Indians, without losing heart dislocated themselves to new spaces, countries and environment to write a new document of success. Fiji and many other such countries are living examples.

Once their survival was stabilized on the social front their fight for political acceptance and excellence created a new history. Today Indian Diaspora can claim an overall success in almost all the fields they are working and living.

Pravasi Bharatiya Divas, an official event in India has brought a manifold meaning in their lives. In such status it is relevant to understand the POLITICAL SOCIOLOGY OF INDIAN DIASPORA: ISSUES, PROSPECTS AND CHALLENGES.
